

## Process Overview Guide (Sealed Deck)

This guide is designed to assist you with each step of the Sealed Deck Verification Process, but do not take any action until you are instructed to do so.

**NOTE:** While it may be tempting to review all the cards immediately after opening, wait until the **Deck Building and Registration Step**. This will ensure you have enough time to complete all necessary steps throughout the process.

### Sealed Deck Verification Steps

**1. Opening and Observation:**

*Open Each Pack.* Add your name to the player field on the checklist. Count the total number of cards in each pack, spot checking for irregularities, and then secure the cards in the bag.

**2. Passing:**

*Pass the Card Pool.* Give the opened card pool to the player opposite you.

**3. Verification:**

*Verify the Cards.* Write your name on the Set Checklist as the verifier. Sort, verify, and record the card pool, then secure the cards in the bag.

**4. Passing:**

*Return the Pool.* Pass the card pool back to the player who opened the cards.

**5. Confirmation:**

*Confirm Accuracy:* Ensure there were no mistakes during verification.

**6. Deck Building & Registration:**

*Build Your Deck:* construct your deck, and mark each card played, including your chosen Leader and Base.
